

AIR - SEAL

FOOT SWITCH

- ▲ The Air-Seal foot switch was designed to operate in various environments, wet or dry, while protecting the customer's critical electrical components. The Air-Seal offers the benefit of isolating the electrically live snap switch from the floor, which also offers environmental protection. Other benefits include long, trouble free, life and suitability for a wide range of applications. Available in momentary and maintained variations with SPDT snap switch mounted in a 9/16" UNF bulkhead mount. The Air-Seal is also supplied with a 10 foot, 1/8" ID PVC tubing that connects from the pedal to the remote air switch. Only from LINEMASTER® - American made innovation at work.
