

DOLPHIN FOOT SWITCH

LINEMASTER® presents the Dolphin foot switch. The Dolphin is unique in the way it can be actuated. Unlike many of the other foot controls offered by LINEMASTER®, the Dolphin is a circular switch that has 360 degrees of actuating points. Used widely in both industrial and medical applications, this switch is very diverse. The Dolphin can be seen in applications ranging from order picker trucks to use in the ophthalmic field. The unique design offers the end user a different look and a waterproof solution. Being made from robust plastic makes the weight of the switch miniscule, but if the user needs to add a little weight to the switch a heavy gauge steel plate can be attached to the bottom. Only from LINEMASTER® - American made innovation at work.
