

## HI-TREADLITE FOOT SWITCH

LINEMASTER® introduces its Hi-Treadlite foot switch. This pedal was designed for multiple applications while offering the end user a smaller foot print that is functionally sound. Known for its long life, the Hi-Treadlite can be seen in applications like laser cutting, pad printing, and wire coiling. The Hi-Treadlite is very similar to its brother switch, the Treadlite, but it stands a bit taller for those users looking for a switch that has a little higher starting point. This switch may be small, but the durability of the steel housing and mechanical design can stand up in many different environments. Only from LINEMASTER® - American made innovation at work.
