

# MOTOR SPEED CONTROL FOOT SWITCH

- The LINEMASTER Motor Speed Control foot switch offers the precision required when operating variable speed equipment. This ergonomic design uses a high impact polymeric cover and base to give the user a durable, long lasting foot switch that will not rust or corrode. Standard models come equipped with dual cordsets to retrofit to many small fractional horsepower universal AC/DC motors. Special variations are available upon request to meet the customer's needs. Only from Linemaster, American made innovation at work.
