

## AERO CHANNEL FOOT SWITCH

Linemaster introduces the new single, twin, and triple AERO wiring channels. The AERO Channels bring a new modern design to the foot switch world offering a compact design with curved edges that are fluid shedding. Made from robust high impact polymer, these channels can withstand the abuse seen in most applications. A molded handle feature comes standard with each channel for ease of picking the foot pedal off the floor and as an added bonus for the twin & triple models the handle also serves as a cord wrapping aid. Each version of the AERO Channel is equipped to accommodate our popular Aquiline series pedals or new Flip-Up Pedal design.
